Art Unit: 1712

1. The amendment filed 11/26/03 is incorrect in that it indicates that claim 5 is pending when in fact this claim was deleted in the amendment filed November 7, 2001. The subject matter of this claim was included in claims 17 and 18, also filed November 7, 2001. In response to this office action applicants are requested to send a corrected version of the pending claims.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 15 and 16 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Knepper et al.

Applicants have amended the process claims such that include the limitation of previous claim 10, which was indicated as being allowable. However these claims are drawn to a product rather than the process. Applicants have not provided any argument or evidence that the claimed product is, in fact, inherently different from the product prepared by Knepper et al. While the claims include a process limitation, determination of patentability is based on the product itself. If the product in a product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process. In the instant application, it does not appear that the order of addition would result in an inherently different product. These claims are rejected as being inherently the same as that found in Knepper et al.

5. Claims 1 to 4, ~~6 to 14~~, 17 and 18 are allowed. The prior art fails to teach or suggest the particular order for mixing the ingredients as claimed.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Margaret G. Moore whose telephone number is 571-272-1090. The examiner can normally be reached on Monday to Wednesday and Friday, 10am to 4pm.
